

Learning Management System

STREAMLINED EMPLOYEE COMPUTER-BASED TRAINING

All organizations need to educate their employees about cyber security risks. That's why Cofense developed a fully-functional Learning Management System to help administrators manage content and ongoing education. Cofense LMS was developed to reinforce the behavioral conditioning and experiential learning delivered in Cofense PhishMe with the ability to expand training in areas of security and compliance important to your company. With Cofense LMS, companies can easily upload additional content for a fully-personalized catalog and experience.

Make It Your Own

Make your employees feel at home. Leverage your company's branding by adding your logos or color schemes to the LMS.

Automate Your Security Training

A variety of tools are available to make deploying training seamless. From user sync and SSO, to automated course plans, Cofense LMS makes security training simple.

Know Your Program is Working

Visualize how your training program is progressing, manage subscriptions, send nudges, and more from the dashboard. When you need more details, drill down to get full data in the LMS detail reports.

WHY CHOOSE COFENSE LMS?

- ✓ **Leverage the latest and greatest Cofense Content**
Choose your favorites from an innovative and ever-expanding training library. Leveraging Intelligence from our PDC, the Cofense content team stays on top of the threat landscape to prepare your employees from real attacks.
- ✓ **Import Your Own Content**
Does your organization already use its own CBT modules? No problem. Import your own lessons and manage your Cofense and non-PhishMe learning materials in one place.
- ✓ **Keep Tabs on Progress**
Detailed reports and visualizations ensure that you always know how your programs are progressing. Automated reminders and manager notifications ensures that employees continue to build their security awareness against today's sophisticated attacks.
- ✓ **Automated Training**
Utilizing a variety of tools in the Cofense LMS, you can deliver training to your employees automatically. The Automated Awareness Training tool sends our training periodically (monthly, weekly, etc), reminds learners automatically, and sends reports to managers. Other tools like Cohort Sync makes sure the right training goes to the right groups automatically.

About Cofense

Cofense® is the leading provider of phishing detection and response solutions. Designed for enterprise organizations, the Cofense Phishing Detection and Response (PDR) platform leverages a global network of close to 30 million people actively reporting suspected phish, combined with advanced automation to stop phishing attacks faster and stay ahead of breaches. When deploying the full suite of Cofense solutions, organizations can educate employees on how to identify and report phish, detect phish in their environment and respond quickly to remediate threats. With seamless integration into most major TIPS, SIEMs, and SOARs, Cofense solutions easily align with existing security ecosystems. Across a broad set of Global 1000 enterprise customers, including defense, energy, financial services, healthcare and manufacturing sectors, Cofense understands how to improve security, aid incident response and reduce the risk of compromise.
